 - CUSTOMER SUPPLIED INSERT
 - DIVISION BARS

CHECKED BY: DL

The sidelite shoe (shown here in red) slots into the track in the fixedlite receptor below. The bottom rail of the panel fits over and down to sit directly on sidelite shoe by adjusting the top rollers. Cushion Capture stops in the top track are then pushed tight against the top rollers to eliminate panel travel.

Optional silicone sealant may be applied to the three aluminum components at the floor.

5/16" high fixedlite receptor must be installed on a firm surface using construction adhesive.

It can be installed:

- 1) Flush in the floor (FIG. 1)
- 2) On the floor surface (FIG. 2)

An endcap to cover the shoe and receptor will be provided.

Monaco - System Components

- 1 - Main Track
- 2 - Snap on Fascia
- 3 - Fixed Lite End Cap
- 4 - Cushion Capture
- 5 - Roller
- 6 - Roller Bumper
- 7 - Adjusting Bolt
- 8 - Hanger Lock
- 9 - Rail Cap
- 10 - Floor Post
- 11 - Carrier Post

General

- A - "T" Stile
- B - Moderno 58 with D Shaped Pull **
- C - System 214 Wide 2 1/4" Stile **
- D - Sidelite Shoe
- E - System 214 Lock
- F - System 214 Edge Pull
- G - Fixed Lite Receptor

Riviera Glass Divider "Collector Blocks" are designed to assist in closing multi-panel sets of sliding door panels by collecting each panel they pass by. When closing the set, the outermost panel will inter-lock with the next panel, and pull it along to its resting position. To re-open, with all required and recommended blocks installed, pushing the outermost panel will collect all panels as a group. Panels will be staggered in the fully open position.

Below you'll find instructions for installing the blocks. Pay close attention to identify your track series (Monaco or Savona), and the correct location and orientation on the panel. Peel and stick the block in place as illustrated, then install self tapping screws to permanently secure. Pre-drilling is not necessary.

IMPORTANT: Read these instructions completely before beginning any installation.

Block Location

Required

Recommended

Panel 3 collects Panel 2, Panel 2 collects Panel 1 and pulls them all to a completely closed position.

Block Orientation MONACO

LONG EDGE of Block
Flush with end of Rail
@ Bottom of Rail

SHORT EDGE of Block
Flush with end of Rail
LONG EDGE @ Bottom
of Rail

Block Orientation SAVONA

Double

Triple

BREAK OFF BLOCK ENDS
to 3/8" x 3/8" then install
